

# DIGI3U

**3-Zone Universal Controller  
for  
G/E or Heat Pump Applications  
It's Out of This World!**

**DIGI3  
FOR  
RNC**

- The economical temperature control solution for the 2-story home market
- Achieve the same level of control with one unit instead of two at a drastically reduced price
- Perfect for RNC (residential new construction)
- Ideal Upgrade to existing heating and cooling systems
- Simple, economical and easy to install and operate
- Total contractor flexibility and control

**zonex**<sup>®</sup>  
SYSTEMS

*comfort you control*

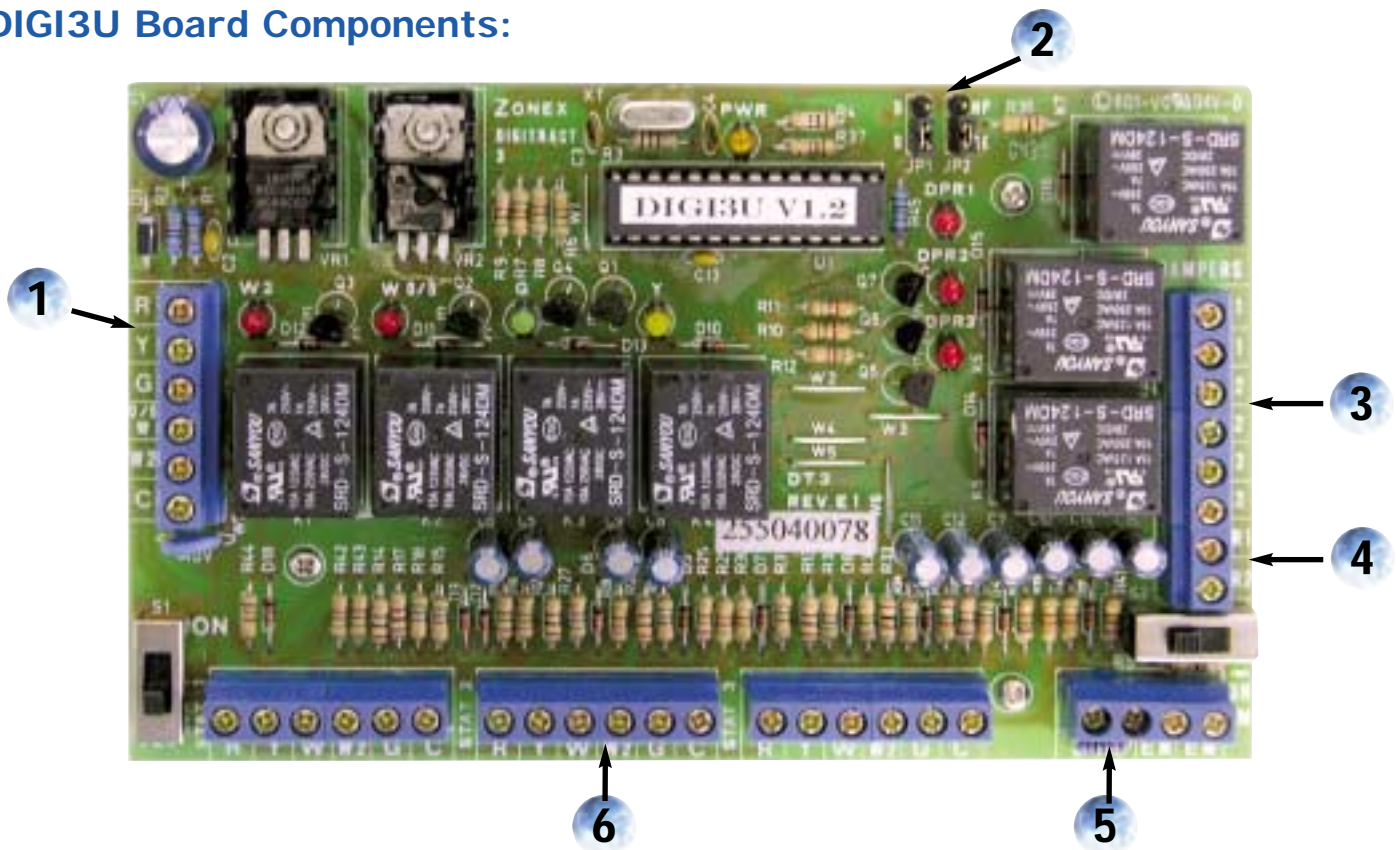

## Advantages of the DIGI3 Universal Controller for G/E or HP Applications:

- Ideal for 2- or 3-zone systems
- Universal Gas/Electric – Heat Pump controller
- Home run wiring for easy installation
- Uses new stronger round or rectangular Dampers
- 2-wire, 24-volt dampers – power closed, spring open
- Built-in capacity control
- Uses virtually any mechanical or electronic thermostat
- Standard emergency heat control
- Economical – meets the needs of the RNC market
- Can be installed with or without a bypass damper
- Purge timer to prevent short cycling
- Configurable jumpers for use with Gas/Electric or Heat Pump with (O) or (B) operation

## Additional Features:

- Auto changeover from opposing zone
- Optional LAT capacity control
- Factory set Hi and Lo limits for equipment protection
- Factory set purge timer to prevent short cycling
- Fan control from any thermostat
- LEDs to indicate damper position and system status

## DIGI3U Board Components:

1. Unit terminals
2. Jumpers for "O" or "B" reversing valve operation, HP G/E configuration jumper
3. 2-wire outputs for damper wiring
4. Transformer to power dampers
5. SS for capacity control with optional LAT sensor
6. Thermostat connections use Gas/Electric thermostats (Use H.P. on Stat One for H.P. Applications)
